

A smarter fire sprinkler, without the hidden costs

Code-required sprinklers are now standard in new homes, ADUs, and major renovations. But what many homeowners don't see coming are the hidden utility costs: capacity fees, higher monthly charges, and long delays.

Automist is a smarter alternative, delivering advanced fire protection without the burden of utility upgrades.

Protection that respects your home, and avoids:

\$6K–\$17K+
one-time utility capacity fee

\$27–\$61/month
permanent monthly service charge increase

4–12 weeks
utility scheduling delay to your project

Why homeowners choose Automist

Target the flames, avoid the flood

Patented technology suppresses fires fast using up to 90% less water than traditional sprinklers.

More time when seconds matter

Rapid response helps contain fires early, protecting what matters most.

Crafted to complement your home

Discreet, wall-mounted nozzles and refined finishes blend beautifully into any space.

Insurance-ready fire protection

Meets national codes and standards, designed to support peace of mind and coverage.

FEATURE	AUTOMIST	TRADITIONAL SPRINKLER
